

As winter's grip begins to lift, and we long for Mother Nature's spring symphony, we often overlook her more subtle **masterpieces**.

So take this week, look through a different lens and find the **beauty in our landscape's trees**.

Bur Oak

A tree's winter appearance is an important (yet often forgotten) consideration when selecting a species for your landscape.

At Springhouse Gardens we can help you find trees that really shine all year long. And with spring just around the corner, now is a great time to decide what you're going to plant, so call or stop by and **plant a masterpiece this spring!**

Weeping Willows

Ginkgo

Twisty Baby Black Locust

...there's **beauty** in the details

Male Kentucky Coffee Trees ARRIVING!!!

Enjoy the beauty of this native without the mess!
